

FOR IMMEDIATE RELEASE

NORAM COMPLETES CLAYTON VALLEY LITHIUM PROJECT BULK SAMPLING FOR LITHIUM METALLURGICAL TEST PROGRAM

Noram moving ahead with bench process lithium separation testing

Vancouver, British Columbia – August 23rd, 2016 – Noram Ventures Inc. (TSX-V: NRM Frankfurt: N7R) ("Noram" or the "Company") is pleased to announce the completion of bulk sampling on its South Block (Zeus and Hades) lithium claim groups in Nevada's Clayton Valley (see [Figure 1](#)). These lithium rich claystone samples have been sent to Membrane Development Specialists LLC (MDS) to test the viability of membrane separation of Lithium from the claystone material ([August 2, 2016](#)).

The focus of the bench test is to substantiate the recovery yield of lithium carbonate directly from the mineralized claystones using MDS's environmentally friendly system.

Bulk samples weighing approximately 50 kg each have been collected from two locations on the Zeus and Hades claim groups. The first bulk sample was collected from the same locality as samples ZS-2-029 through ZS-2-031 on the Zeus claims. The previous samples were part of Noram's Phase II sampling program and were 3 vertical chip samples that covered a 12 foot (3.66 m) section of stratigraphy. The samples averaged 917 ppm Li. The second bulk sample was from the spoil pile of the previously announced borehole discovered on the Hades claims ([July 22, 2016](#)). Three samples previously collected from the spoil pile averaged 933 ppm Li. Both bulk samples have been sent to Membrane Development Specialists, LLC in San Diego, to conduct bench testing of lithium extraction methods.

Bradley Peek, MSc and CPG, as independent technical consultant supervised the collection of the bulk samples.

The technical information contained in this news release has been reviewed and approved by Michael Collins, PGeo, who is a Qualified Person with respect to Noram's Clayton Valley Claim Group Project as defined under National Instrument 43-101.

About Noram Ventures Inc.:

Noram Ventures Inc. (TSX-V: NRM Frankfurt: N7R) is a Canadian based junior exploration company, with a goal of becoming a force in the **Green Energy Revolution** through the development of lithium and graphite deposits and becoming a low-cost supplier for the burgeoning lithium battery industry. The Company's primary business focus since formation has been the exploration of mineral projects that include the lithium projects in Clayton Valley in Nevada and the Jumbo graphite property in British Columbia. Noram's long term strategy is to build a multi-national lithium - graphite dominant industrial minerals company to produce and sell lithium and graphite into the markets of Europe, North America and Asia.
