

FOR IMMEDIATE RELEASE

NORAM COMPLETES SELECTION OF LITHIUM TARGETS ON ITS SOUTH BLOCK CLAIMS IN NEVADA'S CLAYTON VALLEY

Initial core drilling plan submitted for Zeus and Hades claim groups

Vancouver, British Columbia – August 25th, 2016 – Noram Ventures Inc. (TSX-V: NRM Frankfurt: N7R) ("Noram" or the "Company") is pleased to announce it has selected 55 initial core drilling targets on its South Block lithium claims in Nevada's Clayton Valley (see [Figure 1](#)).

The exploration and core drilling plan has been submitted to the U.S. Department of the Interior Bureau of Land Management, Nevada State Office Division of Minerals Management and the State of Nevada Bureau of Land Management as the basis of Noram's permit application to carry out an initial drilling program.

Drilling will focus on the Zeus and Hades claim groups, where previously reported surface and sub-surface sample assay values ranged from 206 ppm to a high of 1,670 ppm lithium and averaged 780 ppm lithium within the claystones (see news released on [July 22, 2016](#) and [July 26, 2016](#)).

The initial drilling campaign will include up to 55 shallow, 60 to 80 feet (18 to 24 meters), core drill holes. Geologic investigations on the Zeus claims showed that marker beds are present within the lithium-rich sediments that will enable correlation of the beds between the planned drill holes. The correlation between drill holes will add a higher degree of certainty to any future lithium resource calculations.

Bradley Peek, MSc and CPG, Noram's independent technical consultant, will oversee the initial drilling program.

"We are very pleased to be advancing our Clayton Valley lithium project to the next stage of exploration after the very positive results from our Phase I and II surface and sub-surface sampling programs," said Mark Ireton, President of Noram.

The technical information contained in this news release has been reviewed and approved by Michael Collins, PGeo, who is a Qualified Person with respect to Noram's Clayton Valley Claim Group Project as defined under National Instrument 43-101.

About Noram Ventures Inc.:

Noram Ventures Inc. (TSX-V: NRM Frankfurt: N7R) is a Canadian based junior exploration company, with a goal of becoming a force in the **Green Energy Revolution** through the development of lithium and graphite deposits and becoming a low-cost supplier for the burgeoning lithium battery industry. The Company's primary business focus since formation has been the exploration of mineral projects that

include the lithium projects in Clayton Valley in Nevada and the Jumbo graphite property in British Columbia. Noram's long term strategy is to build a multi-national lithium - graphite dominant industrial minerals company to produce and sell lithium and graphite into the markets of Europe, North America and Asia.
